

OraLabs®

CONTRACT PACKAGING CATALOG 2016

PRODUCTS YOU CAN BELIEVE IN

A woman with dark hair tied back, wearing a pink tank top and dark shorts, is climbing a steep, light-colored rock face. She is using a rope and a climbing device. The background shows a vast, mountainous landscape with green vegetation and a clear blue sky. The text is overlaid on the bottom left of the image.

The World in which we live is always changing but our goal remains the same. Be Outdoors as much as possible, play, live and have fun. No matter where your adventures take you, make sure to stay protected.

To touch, taste & smell innovation

OraLabs, Inc.

Founded in 1990, OraLabs, Inc. operates out of an OTC Drug, FDA registered and audited, 115,000 sq. ft. facility in Parker, Colorado. Our facility produces drug and cosmetic products. We employ approximately 300 people. OraLabs is a leading product developer, manufacturer and distributor. Product categories include lip care, oral care, skin care, sun care, foot care, analgesic

and antibacterial hand sanitizers. Products are manufactured and sold under OraLabs brands, private label, licensed brands, contract manufacturing and national brands. OraLabs products are sold in more than 100,000 retail stores, 35 countries and are sold in all classes of trade including, all retail, hotel, airline, promotional and professional.

Capabilities

Research, development and product formulations for gels, lotions and liquids fall within our expertise. Use your formula, our existing formulary or our knowledge to develop your custom formulation. Batch sizes range from 200-400 lbs. Our validated mixing, filling and cleaning processes allow for flexible and low cost processing. Our batching and filling system allows for lower customer MOQ resulting in reduced inventory costs for our customers.

OraLabs Engineering team designs and maintains high speed automation to offer

top quality products. If existing automation doesn't fit your product needs, we can design a line that will. Our art and package design department works with major retailers and national brands. We are experienced and familiar with customers packaging needs. OraLabs' annual capacities are in excess of over 200 million units of various products. OraLabs manufactures for many well know companies/ brands as well as many specialty lines; all under strict confidentiality.

Quality Compliance (cGMP)

The Quality Assurance team monitors our strict cGMP production and processes through internal audits to assure a strict regulatory compliant environment. Each and every process is conducted through Standard Operating Procedures. All validation work

and testing methods are compliant under CFR 21 regulations. Our in house Micro Lab tests every batch prior to leaving our facility. In addition to the FDA, OraLabs has many outside audits performed to comply with customer requirements.

Why do business here?

The primary source of our sales are derived from referral, repeat and long term customer relationships. Our greatest assets are our facility and dedicated employees, who all care about each and every customer. A visit from you or your organization will provide the most comprehensive understanding of how OraLabs can be a reliable partner to help your brand grow.

Allow us to show you a product you will be proud to have your name on !

A Letter From Quality Control

We only have to take a look to recent headlines to discover products that were sold as safe caused illness, and in some cases, death, because of contamination.

Aside from microbiological contamination, there can be questions of product purity and the reliability of the ingredient label claim.

We take the mission of providing a safe product seriously by undergoing regular audits by the Food and Drug Administration (FDA) and numerous third parties. We manufacture cosmetics and Over-the-Counter (OTC) drug products for customers all over the world including, most major retailers, private label, contract manufacturing and for the promotional products industry. Oralabs, Inc. applies the same high standards for all customers.

Oralabs, Inc. is registered as a Drug Establishment on the FDA's website. To view our current year registration, go to www.accessdata.fda.gov/scripts/cder/drls/default.cfm, type Oralabs in the space and click the Submit Query button. Registered facilities are regularly audited by the FDA. Always know if the products you buy come from a registered facility.

Oralabs, Inc. has systems which meet the FDA's current Good Manufacturing Practices listed in 21 Code of Federal Regulations, parts 210 and 211. These are federally mandated regulations passed by Congress that list requirements for Over-the Counter drugs.

Oralabs, Inc. uses ingredients that meet or exceed the requirements defined in the United States Pharmacopeia (USP) for cosmetic and OTC drug use. We perform analytical and microbiological testing on every batch to ensure compliance.

Oralabs, Inc. reviews labeling regulations and develops artwork templates to be compliant.

For questions regarding our manufacturing processes or other technical issues, contact me directly.

Sincerely,
Teresa Purdue
Quality Assurance Director

International Sales

Private Label & Distributor Options

Want to launch your OWN BRAND in your country?

European Retailers, Asian, Middle-Eastern or Latin American distributors all have access to our private label/OEM capabilities. We manufacture a wide variety of lip care, breath fresheners and sour candy products covering a wide spectrum of needs for OEM and private label. We package products to your specification, offering a turnkey service. European and ASEAN regulatory standards are followed strictly to avoid registration issues when importing; so when you order from us your product is ready to move straight into distribution, no matter what corner of the world you distribute to.

Would you like to become a Distributor?

OraLabs, Inc. will provide you with every documentation your Health Ministry will require, from Certificates of Free Sale to Microbiology, Stability and In-Vivo Tests. You name it, we will deliver it so you can only focus on what you excel at: distribution in your country.
